

Warralily rolls out the green carpet

BY DEAN WEBSTER

WARRALILY team members and representatives from their Community Residents Group received the Community Engagement Award for their Discovery Trail Map at the recent Green Carpet Awards

The awards are held in recognition of the individuals and organisations that work hard throughout the year to grow sustainability and resilience within the region to inspire the local community into action.

The Green Carpet Awards are an initiative of Future Proofing Geelong and aligned with the goals and objectives of the organisation and the Low Carbon Growth Plan for the City of Greater Geelong.

The Discovery Trail Map was launched at the Wetland Walk n Talk in February as a resource for local residents who want to ensure their families have a strong connection to the outdoor environment.

The map details opportunities throughout Warralily for all age groups to engage, explore and discover nature right in their own community.

This award recognises the commitment of the developer and the community residents group in supporting local families who know that getting outdoors amongst the natural environment is crucial to health and wellbeing.
